## WHO AM I ?

I am a Diploma in Digital Design and Development student at Republic Polytechnic (2024-2027) with a strong interest in building user-focused digital solutions. I have hands-on experience in web technologies such as JavaScript, React, CSS, Python, and SQL, and enjoy applying problem-solving and design thinking to real-world challenges. Through projects like the OCBC Ignite Innovation Challenge and Polyos, I have worked collaboratively to develop functional prototypes and AI-powered applications that enhance productivity and digital experiences. I also bring practical workplace experience from customer service and caregiving roles, which have strengthened my communication skills, adaptability, and attention to detail.
