BugTrace

FEATURED

Created a web-based bug tracker as part of my development portfolio, showcasing backend routing, form handling, authentication logic, and dynamic UI rendering using Express and Bootstrap.

Node HTML CSS JS

C346 CA2 - Mobile App Feature Demonstration

This video demonstrates the core features of my C346 CA2 mobile application, including data fetching from an API, user interaction, and dynamic UI updates. The app showcases practical implementation of React Native concepts such as state management, component rendering, and basic CRUD operations.
